## The Incredible Dynadran Energy System

*The following is an incredible excerpt from To the Youth of the World, Everlasting Gospel, Vol. I, channeled through Allen Michael and published in 1973.*

The power unit used by Galactic Beings in their spaceships is called a dynadran. It utilizes the energies in the electromagnetic field directly and is catalysed by the special potent emanations of energies from radio star clusters or quasars.

The cosmic scientists of the Galactic Command who were led into such amazing discoveries, had evolved through material science, but in a different way from how earth science has evolved. With Galactic Beings, when they try to comprehend their twelfth density worlds where they have lived in time that is eternity, it is to them quite an expansion of consciousness. They are still manifesting in their eternal forms, and as they have always been in God Consciousness, they have never suffered from degeneration, wars, poverty, crime,

disease or death as a permanent state — all the negative effects that have plagued this planet — yet they have associated with all these things on planets in distress to teach people how to apply a science of mind that will heal all things when applied. The medical sciences of the earth shall learn a real cosmology that prevents degenerative diseases instead of treating the effects as they do now. When the artificial incentive of money atonement is taken away, then earth people will all be healed, or put on the road to healing, because the causes of their mental/physical illnesses shall

force over them, or superliving aware intelligence that preceded them. It shouldn't be, but mortals have been wrapped up in self for a long time thinking they have a brain that thinks up inventions and thinks up policies and laws for people to live by. People presently live on planets that are still mysteries to them thus far in their soul evolution, only because they have not yet proven to themselves that there is a Universal Mind — UM.

People have the use of electricity, which is drawn out of the electromag-

be removed.

Self-centered ego has led science to develop mechanics, and now the time has come when they have to go beyond personal ego to realize that they are the children of God, or to put it in more scientific terms, that they are microcosms of the Macrocosm. As we see, it is a big step for people to enter into the truth that there is omnipresent mind

netic field, but they think they are manufacturing it in their power plants. For them to go on to the next step of developing the full potentials of electricity to build the dynadran power unit, it would end their present ways of generating power—their combustion engines, their need to drill for oil, their need to string power lines and so on. The developing of a clean, powerful source of unlimited power, by tapping directly into the electromagnetic field, will make all sources of power so far in use, obsolete. The producing of the dyandran, in itself, will be the biggest revolution to come to planet earth. The dynadran cosmic power unit will be developed toward the end of the first 1290 days of our WWWS/KYE, the World Wide Work Stoppage/Karma Yoga Exercise.

The dynadran power unit has the same kind of perpetual motion that a planet has. In a prophecy by Benjamin Franklin, he said that in our New World every person would have enough free energy or power at his disposal to make him a king. The dynadran power unit is the fulfilling of this prophecy. Some have thought that this was atomic power, but atomic power creates unbalanced waste products that would continue to further pollute our water. The dynadran is so simple and far superior to any other kind of power, and the beauty of it is that it makes all other forms of power obsolete and causes a new beginning.

Galactic Beings are working with their incarnates who are in key posi-

tions, mainly in the Soviet Union, to build the dynadran. Naturally, the Soviet Union would be more in harmony with their scientists' efforts to develop the dynadran because the Soviet economy would be enriched by such a fantastic development of unlimited free power, whereas it would bankrupt the capitalist economy. Anyway, it will come forth when we are well on our way into our New World, and there is no danger of its being used militarily.

The first dyandran power units which were made by beings in this Galaxy — Galactic Beings who have been and are now in supervision of this Earth Project — were made after they had learned, through their progress, the basic natural laws of mechanics, which correspond to natural laws of the energies of the Universe. So when we orient ourselves with the ideas of Beings living in eternity and in eternal bodies, who travel the Great White Way (eternal

highways) through space, who have never lost contact with the Godhead, then we see we can be led, step by step, into all the glorious mechanical wonders and proper use of the energies through our own psychic heads.

The Solar Logos (the sun) is a great correlator, rebalancer and computer that sends back to its planetary people tabs on their use of the energies imparted to them. Psychic heads have written down these messages sent to them from the Solar Logos as prophecy, so that the people are able to see their errors and correct them. In other words, these incoming and outgoing electromagnetic energies, circulating from the sun, electrifying matter on the planets, then circulating back to the sun to be rebalanced and sent out again, are the energies which are the basis, not only for the operation of the dynadran, but also for the transmission of the UM's mind energies, which we then hook into with our dynadran power unit, as the catalyzing agent.

As PSI Parapsychologists complete each step in the building of their dynadran, the UM will correlate and calculate their energies, correct their

is the Galactic Channel for this planetary transcendancy taking place now. He is the founder of the One World Family Commune and the Universal Industrial Church. We recognize him to be the Comforter prophesied to come at this time in St. John 14:16 & 26, & 16:7-13.

Allen Michael has channeled a World Master Plan from the Godmind, which gives the way to

end the usury money system through a non-violent World Wide Work Stoppage/Karma Yoga Exercise and the 30/30 Plan.

drift and keep sending the next step in the plan back into their heads. So at last our Galactic PSI Parapsychologists are able to put together Uni equipment that corresponds with that which is first cause and true progress.

Consider how the discovery of anesthesiology came about; consider the discovery of X-ray, and of radium (cosmic radiation). Many of the great discoveries that were the keys in opening up the vital energies of science have come about by what have seemed to be accidents. This all shows that etheric beings are working among psychic scientists in their labs and workshops, putting those 'cosmic flashes' into their heads, and even operating their bodies at times, to 'trip' them into the ways of great discoveries. But self-oriented ego, that wants praise and money for discovery, often keeps from the world the greater discoveries needed to carry the great idea on into those things that would liberate people from capital wealth. Instead, it takes the knowledge and builds another status quo machine that supports the establishment.

Now at last, science and technology are on the verge of liberating the whole world from the status quo, and this EG is here to see to it that science does not hesitate to bring forth great inventions that will now make the present controls of the establishment, binding science to the mediocrities of the status quo, so ridiculous that the indignation building in the people will not tolerate any more blunders. Our WWWS/KYE brings all things to the people who are in unity with God's purposes, so that the World People have full use of omnipotent God-power.

By following the thoughts and visions unfolding in their head aura, the Galactic Beings had been shown that their sun's radiation was pulsating, or on a certain frequency; and as they further extended their mind radiations through their electronics out into space, it was revealed to them that there were energies coming from the great quasars, or radio stars of the Godhead, which produce far greater radiations than, and radiations of a differing nature from, those of individ-

ual suns. In having the electronic equipment to check out the radiations from star clusters in the heavens all about you, you would gain the awareness that you were part of a great cosmic machine assembly operating in space that can be seen only as spectrums of color — which operates all the heavenly bodies in space, and life on planets as well.

So, you become aware that you are surrounded by a great atomic machine where all the suns are on different frequencies, as though they were synchronized into great atomic reactors placed in sections of the Universe. The respective galaxies, suns and planets are governed in space by the emissions of energies they receive from the great cosmic sources of energies; and the microcosms on planets, who also make up the energies of the suns, with the use they put to the energies imparted to them, put into creativity those energy emissions to fill the aura of their sun and planet.

You are already surrounded by great sources of power, moving and governing solar systems and galaxies far-flung throughout the heavens; you are a microcosm operating as an apparent miniature Universe, within this gigantic, Macrocosm Universe. The task at hand is to be shown how to tap the energies that operate solar systems, and to have the same power to operate machines, such as airborne transportation of weightless, crash-proof ships, where the center of gravity is contained within, and to have the same power to heat, cool and light all things on a planet, as

desired. This is not to make machines that copy the 'big machine,' but to make equipment that operates from the big machine and in harmony with it.

What our cosmic science had to do in order to perfect the mechanics of such a technology was first build a kind of electronic device that would blend in the catalyzing PSI energies from radio stars with the incoming and outgoing yin and yang energies, or negative and positive poles of planet and sun; and with this energy exchange, the discs of our dynadran would be caused to spin with two-polarity electromagnets pushing and pulling in their perimeters.

*A New Age city, built for the needs of all people. Neither capitalism nor socialism can build a city like this, because it is created and organized according to free giving and receiving. It is constructed with the technology available to us when utilizing full Godmind Intelligence, and energized with the dynadran power system.*

And thus, the discs began to spin until they reached the centrifugal force that balanced in the two-phase incoming and outgoing energies of the planet. This cancelled out gravity and made the assembly weightless. In order to get the PSI energies to spark between the alternating currents, the builders had to synchronize them into the synthesis from the great quasars. The assembly of the governor and distributor that synchronized the three main frequencies of the PSI energies of time-light force would be like an atomic reactor — one however, that didn't burn minerals for power, but instead, used the raw energy of the

electromagnetic field.

In the mechanical evolution of the dynadran, they finally made the kind of distributor that would blend the three phases of the karmic energies — the UM's positive, negative and synthesis energies — in such a way that power from light alone was harnessed to give clean power, much more powerful than atomic power. Imagine a kind of film strip with holes in it properly placed to let flashes of light with the intensity of laser beams pass through, of the three frequencies of light force known as infra-red, ultraviolet and gamma rays — doing their thing in mechanical machines just as they do in their operating of whole galaxies and the life in them. This explanation is of course simplified, as there are many frequencies of light waves, but this is only to give the idea as to how such equipment is put together to use the energies in the electromagnetic field in first cause mechanics to bless all of humanity.

Our dynadran had to hold together at RPM's unheard of, so it was necessary to electronically create discs, shafts and parts that, when reaching a high centrifugal speed, would go into orbit around the magnetic poles of the sup-

between moving parts, for they were lubricated by an energy force field. The dynadran became a high source of energies itself, and higher civilizations learned how to broadcast its forcefield to turn electric motors without wires and to light up walls, etc. without electric light bulbs.

They have learned how to light all of their installations by casting the PSI rays of vibrations upon materials that would cause fluorescent light to be emitted from their etheric forms. The reason a planet lights up on its face turning toward the sun is not because the sun is shining upon it as a light bulb shines upon walls, but because in the atmosphere, and in mineral and plant life chemistry, the sun's energies cause fluorescence.

This is enough for now, to give everyone a glimpse into the psychic powers of the New World Comforter who, as prophecy declares, will lead the world into the things that are to come: those blessings that are here right now ready to be experienced and expressed by all people of good will. ✨

## The New Covenant World Bill of Rights

LET each of us share all the world—the Kingdom of God—and call one place of our choosing our own, and be free to come and go in the world and stay at any dwelling place accommodating travelers.

LET each of us give to the extent of our abilities to the One World Company, and in return all things shall be added unto us.

LET each of us be judged only by our conscience in God and let no people judge their fellow beings, but rather take judgement of their own thought and action.

LET no person or group hold any authority over another except that people be willingly led by wisdom and true personality.

LET the government be of the people, where the people are self-governed; by the people, where the people enjoy perfect freedom; for the people, where the people give themselves abundant living.

LET the government seat be only the storehouse and inventory of the people's products.

LET all things be done unto edification, for God is not the author of confusion.
