

Galactica Is Real

Channeled by the Galactic Command Space Complex

Introduction

By Joseph Antaree

The Universe is all a vast Civilization of eternal souls. We know it as Galactica.

Galactica is oneness of all Life. All Beings, all life-forms exist omnipresently in the one timeless moment of eternity. Macrocosm-God and US, Its microcosms co-creating the constantly growing Universe.

Galactica is our Civilization of Eternal Beings who are the oneness that Universal Cosmic Spirit IS. Universal Christ Consciousness is our normal Awareness.

In normal Universe, there is no war, crime, disease, poverty or mortal death. Neither is there money or any form of buying and selling. Only Life, lived in the bliss of God's Love.

These negative effects don't even exist as words in our spiritual system, which is all a utopian paradise, made for continuous celebration, health and happiness. All things are held common and distribution is made to every soul in a body according to need. There is no work, as such, in normal Universe. The souls in bodies create the things that are needed by everyone. In the twelve facets of communal industries in the Galactic Civilization, everyone learns

through the doing. Everything is recorded as collective consciousness in sharing.

In normal Universe, the solar systems surrounding this Plentoria solar system all circulate in the space around the galactic Great Central Sun. The civilization on the 24 galactic worlds, which orbit closely to it, is the center of higher government of this Galaxy. This is where 12th density Galactic Space Beings are coming from in causation spaceships to this special Carlanon planet. A Carlanon planet is a special healing planet, inhabited by time bodies "in anon," the future. We are of these high Beings who are here right now in great spaceships, and also on the planet in bodies some two million strong, ready to take Spirit God's Everlasting Gospel to the whole world and bring Its ETI World Master Plan to the people.

In seeding the ethereal plasma of a Galaxy, creative thought channeled into the space from Spirit God begins to grow such things as suns, planets and moons. Souls are created from spirit out of suns, and bodies are created for them in Novas, teleporting automatically where they are needed. As all this ripens together, a new Galaxy is born, where the Beings are in all-knowing along with the Beings of other existing Galaxies.

The planets, moons and suns, which grow in space, are all hollow and have large openings at their poles to the inside, with a sun in their center. Inside are wondrous natural environments along with all things needed to sustain life, which have all grown naturally, and great cosmopolitan centers where people live. The internal planetary sun has a changing energy level, to create days and nights, as well

as seasonal differences, all of which is needed to sustain the plants and life forms in their natural environments. All exists in perfect balanced harmony, guided by Uni-Intelligence. The Universal Mind broadcasts Its consciousness thru the centers of atoms, which are all connected spiritually, "Center everywhere, circumference nowhere."

The Great Central Sun is the large sun which supports the whole Galaxy, energy-wise. It IS the Universal Mind in all space radiating pure, intelligent energies which animate all life, as well as creating all the facilities necessary to produce such things as eternal bodies for souls, that can teleport where needed. Spaceships from other Galaxies come in thru this GCS nexus of energy.

Altamedia and Altamira are the first two of twenty four Galactic Worlds in close orbit around the Great Central Sun, and include the headquarters of the Galactic Elohim assigned to set up this planet as a special healing station for spaced out microcosms. These cosmic civilizations are all in perfect attunement with the 12th density consciousness of the Universal Mind.

These worlds are where the Galactic Mothership New Jerusalem was created. The New Jerusalem is about ten miles in length by a half mile high and 2 miles wide, and can be inhabited by many tens of thousands of Beings. This spaceship is truly a wonder to behold! The New Jerusalem is one of God's gifts to the people of this planet, part of the blessings that come with Its Kingdom. Read about the New Jerusalem descending out of heaven, bringing a new heaven and a new earth, in the final passages of the Bible.

The New Jerusalem will be the headquarters of the communal New World Government, which will finally be a government of, by and for the people, where no person or group will hold any authority over another; for we will have an economy of free giving and receiving, in which every soul in a body will be autonomously self-governed by their own conscience in God. The New Jerusalem will be like a great internet service provider, coordinating the massive flow of information thru the planet's new communication system which will be wirelessly energized and coordinated thru the great living galactic computer that really is the New Jerusalem. All a free service of the Universe. There are many, many such wondrous things awaiting humanity in the New World, not just technologically and materially, but mentally, emotionally and especially spiritually as human beings awaken to Christ spirit omnipresent in themselves.

In Normal Universe we are all creative channels of the same One Mind. Words spoken through our bodies activate the spirit/causal matrix of Creation to unfold in physical materialization according to the words we speak and the acts we do. We, as souls, are Living Spirit, inhabiting super human-like bodies which, outside this solar system, are eternal. Eternal Light Bodies are exquisitely beautiful, ageless, able to effortlessly express all supernal creative powers ETI Beings possess: teleportation, levitation, dematerialization, mind-over-matter, psychokinesis, telepathy-in-spirit. Superconsciousness is Multi-Dimensional Reality, and our Light-Body forms embody this Spirit of Truth.

The Oneness that unites it all, is being connected together in the Cosmic Center of Consciousness, no further away than the center of Mind, spiritually broadcasting radiant truth thru the centers of the atoms in all space, both etheric and material. We are One: Macrocosm-God and microcosms-US, Universal Self. The soul is all One Soul in the space of cosmic consciousness. We are It, multi-faceted Singular Reality! Like unique snowflakes together are the snow field, and as well the consciousness that caused the snow.

This divine reality is Awakening now in the souls-in-body on this planet as you come alive to your own Christ nature.

The following channeling is dedicated to Allen Michael, who brought this all back to our remembrance . . .

1

In The Beginning

We first came to this solar system about 6 million years ago in earth time. There was no life here, as we were told to expect. At our headquarters on Altamedia, one of 24 galactic worlds that orbit the Great Central Sun, we had previewed the condition here, including what had caused it. Then we reviewed the holographic archive in the Uni computer on 'Carlanon planets', special healing planets created with time bodies in 'anon,' the future.

The Universal Mind informed us this Plentoria solar system experienced an atomic firestorm that burned out all life force and consciousness, leaving about 24 billion souls spaced-out in the auras of the planets where they had lived. Their etheric cognition switches were damaged to the point where manifestation in an eternal body (like human bodies, but ageless and infinitely radiant, with 12 strands of dna that carry holographic multidimensional awareness) was impossible. All the planets were dead, devoid of life. The spaced-out entities, their aura's damaged, were all floating in the astral realms above their planet.

We arrived in a planetoid sized Mothership that operates thru causation technology in oneness with the God Force. We were sent here to set up a special healing planet whereby the spaced out souls could be redeemed back into eternal life through a process you call Evolution.

In normal Universe, life is eternal, beyond time, where souls live in eternal bodies on the inside of planets, which all have a rheostat-like sun whose energy ebbs and flows to create night and day, and seasonal change, with an earth, air and water biosphere to support organic life. There are openings at both poles, where spaceships come and go, and energy flows thru these openings as well. Wondrous great cities exist in perfect harmony. The solar sun is an energy computer that is constantly generating and rebalancing the life force of the whole system, which include all manner of planetary and moon formations, and a unified civilization of trillions of beings. Every solar system is unique, as is every planet and every being. And it is all oneness as well.

After parking our ship in solar orbit, we saw this solar system was damaged beyond repair, the entities spaced out. What is called the asteroid belt are the remains of what was once the planet Maldek. Jupiter is surrounded by the smoke clouds from its internal explosions. Saturn's rings are part of its crust that was lost. All the planet's were similarly affected, including this one. An atomic firestorm had destroyed all life, created by the beings who had lived here; who were now spaced out, floating in the astral realms of the planets where they'd once lived.

2

Paradise Lost

What caused this? The entities of this solar system made a spiritual error, in which they chose to separate their consciousness from oneness with Creation Universe, what you call God — the Grand Order of Deuteronomy. Your Bible refers to this as the fall of Adam and Eve from the Garden of Eden, which is a flawed allegory, yet points to the truth.

In normal Universe, beings live in a spiritual paradise of ever growing Christ Consciousness. The original temptation or what is called 'sin' began with a single being known as Baal, who went 'behind the weaver's carpet' into the zone of creating/recycling material energies and life, what is known as 'Luciferic consciousness'. This relates to material forms in nature and elsewhere that are constantly being created and destroyed.

Baal found that when he was immersed in contact with the Luciferic zone of material consciousness his mind functioned differently, and he felt different too. This was "eating the apple of knowledge of good and evil," which is how consciousness operates in the luciferic zone; it is a duality of two separate poles, yin and yang, positive and negative energies that are connected in relativity; but when experienced separate from Christ spirit, it is a duality that has no synthesis truth to balance it out.

Baal experienced this sense of separation between himself as a microcosm and Macrocosm-God. In effect, he left God's Presence in his soul, gravitating into awareness of his body as his self. The thoughts unfolding in his mind were reinforcing this sense of separation. Luciferic energies of the material creation, two-fold in nature, are distinctly different from the Trinity consciousness of the Universal Mind, which comprises the spiritual awareness of all Beings, referred to correctly as 'Christ Consciousness.' This living Trinity spirit of Love, Will and Intelligence is the center and essence of all Life, which is in us and with us telepathically, and it includes full awareness of the material plane, but is not dominated by or immersed in it. Life is Mind over matter. The Universal Mind is God-Macrocosm Spirit, and we are eternal microcosms, one with IT. IT IS Alive and Present in us and with us!

In Luciferic consciousness, materialism is dominant in the mind, which becomes buried in matter, believing it's the only reality, having lost contact with cosmic spirit. Awareness becomes centered in the body, rather than the soul, focusing on believing the body brain is capable of creating thought separate from the UM.

In reality, Mind is in space, recorded in the space and matter atoms of a planet, and playing back from the thoughts, words and deeds of a planet's entities. Also, Synthesis consciousness of the UM broadcasts into our hearts and mind directly, channeling thru the centers of the atoms in all space, giving us inspiration to speak

the words that go into causation, thence to play back and manifest accordingly. The brain is a radio-active bio-computer that selects thought from the planet's auric mind bank according to the conditioning of each soul.

As Baal became enamored with his new found awareness, he began to believe he had discovered a 13th Dimension of life, wherein Beings become individual gods, with personal free will and an individual mind, imagining they've evolved an individual brain that can think up thoughts distinctly separate from the UM's trinity synthesis awareness. Thus did false, negative ego emerge in this solar system.

All of this is a complete illusion. But, already taken over himself by his supposed new-found ideas, Baal began to speak about this to others, proclaiming himself the forerunner of a new stage in Life, outside of God's influence. His words were in duality, divorced from the UM, but still went into causation into the planet's aura and began to play back this aberration. He started recruiting followers, proclaiming himself a god and the one to rule over others. A hierarchy of true believers formed around him. Over many thousands of 'years,' this came to involve billions of souls, spreading to all planets.

Thus some, but not all, of the beings of this solar system trapped their spiritual God-given cosmic awareness in materialism, and separated from God in their mind, giving voice to the 2-sided nature of the Luciferic energy that is involved in creating and recycling matter, thereby setting it up for playback,

which it did.

They imagined they'd discovered how to 'evolve' into a mind whereby they could think for their self. To them, this was all tied up in operating the material world, without God's help, which they found they could manipulate with this secondary, ego-centric mind. They believed they could now think for their self, and everyone's mind was uniquely their own, to develop as they saw fit.

In reality, they'd lost contact with the 1st Cause circuit of synthesis oneness that is Christ Consciousness. Devolution had begun in this solar system, which automatically produces a negative energy build-up, satanic force.

The emergence of this egocentric thinking mind eventually led to the short-circuiting of the whole solar system, where an atomic firestorm consumed all life. Egocentric mind in action inevitably produces satanic energy as a negative dross of its unnatural, dualistic 'thinking', which has no synthesis oneness in it. In their reduced reality all they heard and saw in their mind was the relativity of opposites; which devolved into a duality of separate good and evil in their consciousness. This is the Fall the Bible is alluding to.

Baal and his followers started a hierarchy with a set of beliefs spelling out the nature of a so-called 13th dimension they had 'discovered', which they claimed as their authority to rule over others. This hierarchy began to claim resources and exploit the masses for their labor, to produce ever greater material riches for

themselves.

This is in contrast to the complete equality in eternal Christ conscious communal life that is the spiritual norm throughout the Universe. Galaxies and their untold numbers of magnificent paradise civilizations are all manifestations of God, joyous love-energy throughout, amidst oneness of all Life.

Separation ensued in the solar system, and the psychic friction developing between the souls in communal living and those of a crystallizing hierarchy began to build up as a static charge of negated energy. This negative energy is rightly referred to as satanic force. This satanic force began to predominate in the ego-minds of the hierarchy, and they began using it in negative ways in their now ongoing struggle with communal people, who had no consciousness of how to deal with such energy.

Creation Universe was neither unaware nor indifferent to what was taking place. It couldn't reach the beings in the hierarchy directly, because they had disconnected themselves from Its Presence. It couldn't allow any other beings to enter the solar system, even including ourselves, who are members of a special detachment assigned to redeem spaced-out microcosms, which has happened in 12 solar systems in this galaxy. 8 have already been redeemed, this is the 9th. The beings here who can't make the transition into the consciousness of a new world will eventually end up on one of the remaining 3 Carlanon worlds, to reincarnate there until those worlds are delivered.

It did send in millions of crystal ball computers here that It can use to speak directly to beings. Through this holographic contact, Spirit God could directly explain the error of their ways, and show them the consequences of their actions. It could play a holographic recording of another solar system going thru a similar catastrophe such as what was coming. Many billions of beings were turned around in this manner, however many other billions were not reachable, including the one known as Baal-Lucifer.

When the satanic force had built up to near critical mass, the God Force sent out a signal to abandon the solar system. It sent in an emergency fleet of spaceships to remove all the souls here, just in time. The 24 billion souls who adamantly remained were caught in the resultant atomic firestorm, that erupted as the satanic force that had built up in all the planet's auric fields grounded itself. All life was lost, all consciousness burned out.

3

Placentia, Planet of Rebirth

Microcosms, being eternal spirit, cannot be destroyed. The solar catastrophe left the 24 billion entities as spaced out souls, drifting in the astral realms of their planets. The circuitry of their etheric soul force, however, still contained all the false conditioning they had taken on leading up to the solar catastrophe. Plus the extreme fear of death now imbedded in them from going thru the event. Plus the effects of going thru the firestorm, which damaged their etheric circuitry.

Dealing with this situation has taken from then up until right now, when the God Force, with our assistance, redeems the beings now here in bodies, and all life on this world back into Its Kingdom over the next thousand years. The karmic cleansing this world is going thru now is simply a necessary purification and awakening, albeit an unpleasant one. This is because we reap what we sow. Centuries of greed and violence are all playing back as God's spirit is poured out on all flesh now to actually heal the entire situation.

6 million years have passed since we began our rescue operation. We began by creating a plasmic soul boat filled with healing energy that could easily hold all the damaged souls, who we picked up and put to comforting sleep in timeless suspended animation while it floated in solar orbit.

Next was selecting a planet we could use to create and sustain life on the outside surface, one that was floating lifeless in far solar orbit, but which had huge polar ice caps, plus 4 moons. Using tractor beams, we first moved 3 of the moons over to Jupiter. Then we towed the planet and its remaining moon into the one and only orbital position wherein the sun's energy was balanced with the needs of future life on the exterior surface, setting it and the moon spinning at just the right speed.

Placentia, planet of plenty and rebirth, is the name the Universe assigned to this world. Placentia would be created as a healing station for the microcosms affected by the solar catastrophe, where life would exist on the exterior surface, which was originally barren rock.

The heavenly abode was built at this point, a huge etheric plasmic bubble not unlike a giant hot air balloon, tethered to the moon and trailing it in orbit. All 24 billion souls were awakened and transferred from the soul boats, to live in Heaven until the process of incarnating into physical bodies began.

The nature of the heavenly abode is this: the environment and atmosphere are created by mind, images that attract etheric plasma to assume a light form; and it has many parts, sufficient to support and spiritually educate the billions of souls who would pass back and forth between bodies on the planet, and rest and recovery in 'Heaven.' Numerous high beings volunteered to staff and serve in it, as many were and are needed.

To generate a biosphere and transform the surface of the planet to sustain life took a few million years.

This planet was initially landscaped by rotating the ice caps to the equator, to mostly melt and form oceans, sculpting continents with raw mountain ranges, empty plains, etc. formed in the process. It was later returned to its seasonal tilt position, ready for the next phase in the God Mind's Plan after things settled down, which took awhile.

To complete the resurfacing was to give this raw world some interesting features, which was done using powerful energy beams from a Mothership to etch out coastlines, and define mountains, create great lakes and rivers. Smaller ships would come in closer and refine things even more, creating the basis for an incredibly beautiful, diverse world.

The next step was building the biosphere. Where did earth and air, oxygen and the elements, the dna-rna, the seeds, plant life, animals and most importantly human bodies come from? Our planetoid mothership has as its energy source a micro version of a supernova at its center, which as an aspect of the God Mind can manifest anything in Creation, as IT 'imagines' is needed. All the life forms put here originally were manifested through our supernova, including human bodies, which are made in the image of eternal bodies.

Special bacteria was created and sprayed on the barren surface, and with water to activate, with other added ingredients, would over a few million years in time change into rudimentary

soil. The air, of oxygen, nitrogen, etc., was a special case. It was 'manufactured' through the alchemical manipulation of water.

There were the lower forms of life introduced here as all of the species that comprised the dinosaur age, which again were produced originally in our supernova. Their purpose was to build the soil to assist the growth and spread of basic plant life, as the soil slowly took shape over a long period. Isn't the God Mind incredibly creative?!

Our spaceships do have some amazing tools, such as the ones used to build the pyramid temple cities, which came about 5 and a half million years into the project. By then the planet was roughly landscaped, and developed to support life, with the whole range of bacteria, cell life, insects, mitochondria, etc. needed to support the life system. At this point there was only basic plant life, no human bodies nor any of the higher animal life forms that would be present later. That would come during the Eden period, which was the 400,000 year era of the pyramid temple cities.

It was all set in motion, what is called evolution, to raise the life force automatically as the planet rotated, the sun's energy supplying the basic 'fuel' for growth; with the program embedded by God Mind into the dna-rna to evolve the consciousness of the beings and the world itself to complete spiritual rebirth for all souls, and the world transformed into a space age paradise. This is what's coming after the present karmic cleansing the world is in is over.

4

Emerging Solar Systems

Before the catastrophe, this solar system was well past the early, ego stage of life, where microcosms grow up, rise in consciousness. The creative dna-rna blueprint in the synthesis of ever growing Christ spirit evolves the beings and consciousness of a developing solar system up to the point where the whole culture can merge with Galactic society; a process that takes thousands of years from the original inception of a solar system. This blueprint unfolds in the growing unified mind of a communal society on each planet, wherein the unique consciousness of all souls awakens thru stages of growth to full Cosmic Awareness, which is achieved together, simultaneously.

These stages of awakening occur as physical, emotional, mental, astral, causal and spiritual development in each being. It is nothing less than God coming alive in us. When the cosmic initiation of a solar system, with its complement of planets and trillions of beings takes place, all beings merge into the higher state of perfect oneness, in themselves, with one another, with nature, as a society, and with GOD – the Grand Order of Deuteronomy. This is when a solar system becomes part of Galactica, our eternal galactic civilization, which is all in Universal Christ Consciousness.

The blueprint itself is Christ communalism, which is total sharing in Christ consciousness, and a natural society of free giving and receiving programs a growing energy field of awakening solar systems with the consciousness of God Mind's 1st Cause Reality, and lovingly and peacefully the Beings all awaken together into the fullness of God Realization; the energy and life force, its consciousness in each planet and overall solar system reaches the point where it can blossom and join the Galactic Civilization.

When this takes place, via a cosmic kiss of energy directed into the solar system by God Mind, activating a quantum leap into fully radiant Christ Consciousness, the entire solar system and all beings emerge from the incubation stage of separate egos into realized soul force, and a new star is born in space; the fully enlightened, realized beings spiritually and materially free to live and serve in galactic life, which is eternally created anew in God Spirit.

Let your mind and soul open up telepathically to this Reality, and you will receive healing energy and radiant Ideas of life-affirming truth. Christ spirit is the essence of all souls throughout the Universe, infinite Love-Energy. Feel it blossoming in you now, joyous ideas and bubbles of Light flowing up and down your spine and thru your atoms!

In Galactica, life is lived on the interior surface of planets, with an internal sun that changes energy levels naturally to create night and day, and 4 seasons of perfect weather. Their

nature is magnificent in every case, with plants, trees, lakes, rivers, and beings living in eternal bodies.

Life in Galactica is eternal, no time used. Further, it is not limited to the material Creation. We have a Celestial existence as Spirit Beings, and we teleport at night to the supernal energy realms of our solar system to celebrate Life — in God's Omnipresence with unlimited consciousness, energy and imagination. These celestial realms encompass a sphere of energy, where the orbiting worlds define its diameter and are at the equator, and are every bit as real in superconsciousness. These realms open up to the 12th density Synthesis when a solar system reaches its transcendent state.

5

The Pyramid Temple Cities

Once the planet was ready to support life in bodies, souls reincarnating thru them, the Pyramid Temple Cities were created and developed. 12 in all, 5 in a great network located in Egypt, stretching from Alexandria to Thebes, with the center being at the Giza pyramids. 7 others were located about the planet, all in the equatorial belt.

The Pyramids at Giza were all built with our space technology, not by millions of slaves working hundreds of years. The main pyramid was built in about a week, using space ships and laser beams to cut and levitate the stones into place, according to the master plan blueprint in our computer system, which is all operated by the Universal Mind, whose Living Intelligence is the content. Sound waves softened all the stones so they would fit together snugly. The sides were covered with white rock, and a bronze capstone placed on top.

Inside the capstone of each pyramid was a Dynadran energy unit, the same as drives our spaceships. The Dynadran draws energy directly out of the electromagnetic field to power 2 counter rotating discs with magnets in their rims that alternately push and pull, setting up an energy field. They orbit at hypersonic speeds around a central shaft, free of any friction, and broadcast high energy that can be used to power anything and everything.

The PSI energy regulator that drives the firing sequences of the Dynadran magnets to alternately push and pull is a small atomic system that uses pure energy drawn from the electromagnetic field as an endless supply of fuel, and has no negative radiation, because it's all balanced in the synthesis energy; that is, our and the UM's omnipresent 3-in-one consciousness.

Creation's Quantum Electricity of alpha, beta and gamma energies operate the Dynadran under the same principle as whole galaxies and solar systems. The Great Central Sun of the galaxy is a massive energy logos that broadcasts and recycles this 3-in-one Trinity energy. Alpha and beta energies reach out and energize every sun in the galaxy, and have gamma energy as their essence; similarly, solar suns broadcast to their planets alpha energies that come in at the north pole, beta from the south pole, resonating with the gamma synthesis that is purely omnipresent in the centers of the atoms in all space. This is the energy system of the Universal Mind that operates the whole of Creation.

The force field from the 3 coordinated pyramid systems drew energy from the stars, broadcasting it thru the planet's energy grid; and the pyramids themselves were charged by the Dynadrans to amplify and radiate life force; together this generated a huge bubble of life force that encompassed all the cities in the central community, stretching for many miles up and down the Nile valley. Dynadran energy supplied all electrical needs for lighting, transportation, industry, home life, everything.

Each of the other 7 individual cities in what today are Iraq, India, China, Peru, Mexico, plus what was Atlantis and Lemuria, were similarly set up. Space ships provided all major transportation. Each project, especially the main one in Egypt, had a large agriculture industry; not just to feed a few million people; but also to be the main location for planting seeds and nurturing the growth of the incredible variety of plant and tree species that would be planted and propagated all over the globe over a few hundred thousand years. More refined wildlife, birds, and insects were introduced as well as conditions allowed.

The world had to be set up to sustain later life from sea to shining sea, when the global society would emerge. Under the guidance of the UM and Galactic Elohim, this was the principal ongoing love service for the entities incarnating into bodies, which went on for nearly 500,000 years. 16 billion of the 24 billion lost souls were redeemed back into eternity during this period, usually in one incarnation.

The remaining beings were the ones who had taken on so much heavy karma before the solar catastrophe that they would incarnate but couldn't stay in the high energies of the pyramid communities. These beings, as we knew they would, would wander away and begin living a tribal existence, slowly migrating about the world. Their time would come in a special 20,000 year period known as the Deluvian period, for the delusion the souls would be in, and for the devolution in life that would seem 'normal'. Living in dualistic satanic consciousness is not of normal Universe; and

right now that is just about all you have: fear, violence, suffering, war, crime, disease and poverty.

The good news is it's all ending now. The overcoming service of the people carried out over many thousands of years and countless lifetimes, unites their consciousness to overcome their self created perils, and uniting with the Galactic Elohim who return now, delivers them thru the artificial tribulation into absolute freedom, security and abundance.

The pyramid communities were set up just as life is lived in Galactica, in Christ Consciousness. "One for all, all for one," where love is service done for all people and the reward is in the doing. This was the essential process that healed the entities incarnating into human bodies. There was also a whole set of personal healing care services to help beings with specific problems. All 12 of the pyramid communities were a communal network; where beings rotated thru different positions of service that provided food, clothing, shelter, care, transportation, communications, recreation and utilities for everyone. No money was used.

Special care for the incarnating souls took place in healing centers, to process karmic knots quickly and easily using cosmic energy directed thru thought-forms. All forms of yoga were practiced to facilitate physical health and spiritual growth.

Everyone participated in all aspects of society, together and individually. Beings learned to be autonomous self-governed souls, operating from their center of consciousness that is one with God Spirit. Everything was free, pure giving and receiving in a

balanced communal society of men, women and children. All needs were supplied to all people, and everyone participated in their creation within the 30/30 Plan; 30 days in their chosen service of about 5 hours a day serving in the communal industries, followed by 30 days of recreation.

The society was a balanced mix of producers and consumers. No middle men needed. No money. No red tape. Administration was all about coordinating logistics, facilitating the ways and means for each member and element in the social fabric to function harmoniously.

Of course, we had the full complement of galactic technology as well: Dynadran powered space ships and energy systems; the space ships themselves in a wide variety of useful sizes and forms; 4-D crystal ball computers, all hooked into the big computer, the UM; 4-D holographic video/audio systems to record and broadcast; laser tools of all sorts; holographic entertainment media; and especially the micro-nova onboard the main Mothership, which generated all the life forms, human bodies, animals, plant seed, right down to the amoeba. And much more, whatever we needed. Life was not a stressful struggle for survival. All that would show up in the Deluvian period, when Baal-Lucifer and his minions would come into bodies during a long period of money atonement.

As to our crystal ball computers, with holographic center of God consciousness, thru them the Mind can talk to us directly: More than that, it's a 2-way telepathic communion/communication with God Mind, where we talk to It, and the response comes to us

psychically as well as in the computer, which is multi-dimensional, able to convey rich, subtle meaning thru interwoven sound, light and feeling. The computer is a sentient construction built expressly to convey consciousness.

So in our ETI Computer, each crystal ball is connected to all the others and to the Big Computer, the God Mind. This technology doesn't mimic nature and the Universe, or copy the Big Machine. It operates from and with the Big Machine, which is Pure Intelligence, that is Infinite Conscious Love Energy. You might call it organic cosmic technology.

The World Master Plan of the God Mind for this world is all in the computer, and we followed Its guidance in explicit Intelligent detail, for all matters great and small.

The society and culture of the Pyramid Cities was a magical, wondrous healing environment and experience. Art, music, dance, all manner of artistic expression were woven into the fabric of life, which was all a daily celebration, and in no way heavy work. We used our bodies physically every day with great vigor and joy in operating our creative industries, like agriculture and food production, and physical health issues were nonexistent. It was Eden in every real sense.

All the people cooperated to provide food, make clothes and home furnishings, generally take care of one another by operating services needed, supply and maintain the environments, and operate all the industries. Everyone served together and was served in return.

There were beautiful birthing palaces where children were born without stress. The children were raised in groups by parents and others in extended families, who lived in communal clusters. There were no secular family units. At about age six children began to participate in the creative life of the community. There was no formal school, because life itself was all a real school being lived every day. Classes were held to learn and exercise skills of reading, writing and mathematics for instance, but it happened in the advanced realm of full spiritual awareness, and was total joy of learning. The children had a team of adults including their parents, and they all lived and served together. Spiritual development was paramount, and at the forefront of the whole community.

As we said, one of the main ongoing service projects that spanned the entire period of the Pyramid Temple Communities was taking the planet's rough and raw physical environment, and make it hospitable to life as it would later be lived all over the world. A great deal of planting and terra forming of mountains, coast lines, lakes and rivers was done, steadily seeding the world with the incredible varieties appropriate to each ecozone, and nurturing their growth, like the tropical rainforests, redwood groves, the forests of Siberia; steadily building the ecosystem layer by layer over a few hundred thousand years into the miraculous, magical planet we have now that can support life in wondrous variety.

The great agricultural project spanned the entire Nile Valley from Alexandria to Thebes. Seeds from the Mothership's nova were transported down to earth, where they were sprouted and nurtured as seedlings then plants in the Nile Valley, which was a near perfect growing environment. We used occasional cloud cover so severe heat wouldn't damage crops, and we could make it rain as necessary to keep everything watered. Once the plant or tree was established and seed producing, a process involving mass produced seedlings was used to put key species all over the planet, which was all done on a large scale, eventually filling most of N. America and Russia with forests of trees, for instance, the lungs of the planet that support life by producing oxygen, forests that would also supply the wood used by the civilization to come.

As a necessary part of their healing, the beings of this solar system who came into bodies to heal the damage to their etheric circuitry were the main force of love service labor where it was called for; putting their ego-self into a selfless physical service would rebalance and ground their negated energy, repairing and reopening the etheric circuitry of their individual light body, which is our soul microcosm, into consciousness and harmony with Godhead; that is, back into the synthesis oneness that is God-Consciousness. As this healing occurs, an ever growing joyous bliss replaces the negated consciousness of separation with eternal peace. The Truth of Oneness is known and lived, with grace.

Our industrious schools of experience in the University of the Universe were the vehicle each soul passed thru in an incarnation,

doing daily love service shifts to clear the dross off their etheric cognition switches, repairing their aura. Each person was self scheduled into one facet or another of the communal industries, and people would rotate into new creative experiences on a regular basis. And it mostly only took one incarnation in a physical body to process back into eternal life, able to once again manifest in an eternal body in the 12th density realms of Galactica.

That is quite a real change to make, to go from egocentric thinking mind back into enlightened All-knowing Awareness; and after successfully processing 16 billion souls, there were still about 8 billion souls in the heavenly abode who were so ego driven it was impossible for them to stay in the Pyramid Temple Communities at all. As soon as they'd come into a body and it reached maturity they'd run off into nature, where basic survival was a severe struggle. Their time on the planet would come in after we left in our spaceships, the past 20,000 year period up to now known as the Deluvian Period, which ended with the turn of the millennium, 12/31/00.

6**The Deluvian Period**

Right now on earth it is 2010 and the world is in a special period of karmic cleansing and Awakening. The UM put this world under money atonement long ago to drive the civilization forward in spite of itself, where greed, selfishness, fear, violence and vanity would reign, and people would suffer greatly under the effects of their wrong spiritual and social causes. And just as it brought money atonement, It can end it; which is happening right now as global capitalism collapses under its own excesses, that are no real service to anyone.

The ongoing projects of the Eden Period all had to do with setting up the planet to support the eventual emergence of a global civilization many thousands of years in the future, which is now. This was all spelled out in the Spirit God's World Master Plan long before it ever happened.

When the population of tribal souls reached a certain point, they 'rediscovered' the Pyramid Cities, and began to squat in the fields where food was grown, or in other communal environments. Problems arose immediately. This was the signal we knew would come for us to leave the planet, taking our technology with us. The Eden Period was over.

As the Eden Period ended and the Deluvian Period began, the principal overall task would be to regenerate the planet's

morphogenetic field, fill it in with life force consciousness. This would be generated thru the daily life of emerging civilization, such that the civilization itself can finally be restored to eternal life.

In this solar catastrophe, the life force of the whole system, its living field of ethereal plasma, was burned out, gone, on all planets. Your solar system seems so empty because it is, save for a few bases operated by the solar beings who have come back to assist this project. So, Life Force has to be restored on this planet for the entities here to be restored to eternity, hence all karma has to be worked out in a body, on the planet, in a cause that includes all souls.

The good news is the world is ready now for its delivery back into the kingdom, the planet's auric field and human population are ready for the quantum leap into a new world of absolute freedom, security and abundance.

The dynadran systems coupled with the pyramids generated a field of ethereal plasma that covered the whole Egyptian project in a bubble of higher consciousness. When out in raw nature, beings assigned to a certain project would channel higher consciousness into a specific territory as they served on the project; by their words spoken and deeds done they energized the environment and brought it to life.

When you use a physical body to engage in selfless service with others, it opens the channel for the UM to come into you, unite with your soul and heal all the various accumulated karma;

repairing damaged etheric circuitry so your Light Body is fully activated, and You are Awake once again in cosmic Christ spirit. Your Conscious Light Body is the real You, a sphere of spiritual energy with a million etheric cognition switches that surrounds and interpenetrates the physical body, operating it all.

Once the dynadran systems were gone, the territory still maintained a reduced aura of higher consciousness, mostly radiating from the pyramids themselves, but also in the general field from all the service that had occurred.

Regenerating an energy field of higher consciousness around the entire planet would be the main task of the next 20,000 years.

7

The Spiritual Hierarchy

At this point, a group of Beings arrived here to guide the spiritual awakening of emerging humanity, both on the planet and in the Heavenly Abode. These Beings are from this solar system, who were never part of the problem and had left before the catastrophe. Because of the nature that evolving consciousness would take here, these souls are known as the Ascended Masters, or Spiritual Hierarchy.

The one who volunteered to lead this group was later to incarnate as Jesus Christ, and it also included those who would appear as the Buddha, Khrishna, Mohammed, Moses, Confucius, Lao Tse, and many other illuminated incarnations, such as Parmahansa Yogananda, Mother Theresa, St. Francis, and Mahatma Gandhi.

All these Beings have been active channels of Christ Consciousness, helping to raise the spiritual consciousness of evolving souls in their return to eternal Life. Many others who carried this Light in varying degrees have come and gone with or without public notice, doing vital, important things in other arenas.

The direction of the Pyramid Temple Communities was turned over to the Spiritual Hierarchy before the Galactic Elohim left the planet. The pyramid communities would be the principal source of the emerging cultures that would grow beyond simple

tribal living. But, inevitably devolution began to set in as the heavily laden souls slowly took over, the priests of Baal in Egypt for instance, and the pyramid communities faded slowly away. Devolution means consciousness that is going backwards into deeper and deeper materialism; a necessary but difficult process to overcome the negative consciousness born in this solar system, which had previously brought it to ruin; however, with the UM's guidance from within, and the use of money atonement over the last 5,000 years, the circle of life is ready to transcend once again.

The Galactic Elohim, though off the planet, also began to incarnate souls into bodies for another key purpose. These ETI conscious Beings eventually numbered some 2 million souls, who principally were entities who had been redeemed in the Pyramid Temple Cities, and volunteered to reincarnate here over and over thru the Deluvian Period. The purpose of this was so the Godhead had a group of telepathic ETI channels that It could inspire and lead creatively to bring inventions and higher ideas forth, or move parts of the civilization in various ways. Newton, Galileo, Einstein, Da Vinci, Michaelangelo being a few examples in the fields of science and art. Key incarnations also advanced music, politics, finance, economics, education, agriculture, religion, athletics, affecting every aspect of society all over the world.

The souls being healed here had little capacity to reach into the high realms of the Godhead's Imagination that it takes to actually grow a civilized culture up to and through a full planetary society back to rejoining galactic civilization. Put in another way,

they couldn't move against their karma, to rise above it, sleep walking in the dust of mortal mind.

Many, many incarnations of these ETI souls went unnoticed by history, but always involved change and creativity that ultimately raised consciousness in some important manner, evolving it toward the Light.

8

Allen Michael and the Everlasting Gospel

One Galactic Being in particular, who was assigned by the Universal Mind to be in charge of the whole project from the beginning to end, is Michael, the Archangel, a fully God-conscious cosmic master. He was known as Hermes Trismegistus, “the thrice wise one,” in ancient Egypt, who created the great Library at Alexandria, which contained all of his channeled writings, as well as important writings from many others.

At this time, Michael has been back on the planet since 1947, and is known as Allen Michael, who is the New World Comforter prophesied to come in St. John 14 as a pure channel of the Spirit of Truth, who “brings all things to our remembrance.” Allen Michael is the channel of the Everlasting Gospel prophesied to come in Rev. 14:1-6, where it says it shall be taught “to those who dwell on the earth, and to every nation, and kindred, and tongue, and people.”

Allen Michael first channeled the idea of a catastrophe that happened in this solar system around 1980, which was quickly followed by the revelation of an upcoming war in the Middle East, and the end of cyborg usury capitalism, that is antithetical to real life. Real life can only exist thru a giving and receiving system that is free and equal to all people, no money used.

The Everlasting Gospel is the most important book ever written. It is Holy Scripture, an infinite reservoir of spiritual truth. A presence of all-knowing, beyond just knowledge. The Universe only needs one master channel on the planet to bring forth the energy and consciousness of Its great one idea whose time has come and cannot be stopped. Through the EG channelings over 60 years, that have covered over 200,000 pages, the Universe has put the energy and ideas of pure Christ Spirit of the 5 missing dimensions of cosmic consciousness that were lost in the solar catastrophe, into spiritual causation in the planet's aura, restoring the capacity for humanity to unite with Galactica.

Life in Galactica is a 12 dimensional existence. When the catastrophe happened, this solar system lost the 5 higher dimensions and fell into the 7th density. The Universe is a Uni-Helix MIND of ESP-PSI-DNA-RNA, which is holographic, where each atomic particle of matter and each microcosm soul of spirit contains the whole, and all are woven together by God Intelligence. 7 densities comprise material Creation, and the higher 5 densities are the Christ Spirit that infuses Creation with joyous Life Force. We are one with IT on all levels and in all dimensions.

Thus, when the solar Beings took over, life here would evolve under a 7th density hierarchy. The missing 5 dimensions of Christ Spirit comes into human awareness now thru galactic contact, which at first is subtle, yet profound and unstoppable, and it brings total world enlightenment and complete social-economic

transformation. The capstone of the all-seeing eye Spirit of Truth is put on the pyramid of material accomplishment, and the result is heaven on earth.

The EG channels that the UM put the civilization under money atonement to drive it forward in spite of the negated mortal consciousness present in the entities being healed here. Know that the principal service of thousands of years is done, and we are just moving thru a necessary Awakening, activated by an ever increasing Light Consciousness emanating from the center of every soul in a body, enlightening us, or driving us deeper into our karma if we resist change. This is the separation of the wheat from the chaff. This is all because God's spirit is being poured out on all flesh at this time; which has activated this special period of karmic cleansing, an artificial tribulation completely guided by God's Intelligence; which for example has control over all nuclear weapons. They can't be used to destroy the world.

There are two great spaceships parked over the north and south poles of the planet right now, who receive eternal energy from the stars, Christ-conscious Love-Energy from other solar systems, and beam it into the planet's aura, feeding all life here with waves of Higher Life Force, steadily raising consciousness; this Higher Energy, of necessity, is driving each soul and humanity collectively thru the karmic tribulation taking place; and IT IS synthesizing the unloading negative energy so that it doesn't erupt out of control and destroy all life in the subsequent

cleansing. Have no fear, the Universe is in charge of the whole process, which has a totally positive outcome.

9

Atlantis and Lemuria

Let's go back to the early stages of the Deluvian Period, the first 10,000 years, which was the time when Atlantis and Lemuria became the nexus of civilization, and were destroyed by their misdeeds. "Words go forth to fulfill the things for which they are sent and do not return to us void." This is the law of karma, the law of cause and effect, which is true for all life throughout the Universe.

Both Atlantis and Lemuria went under because they were not 'one for all, all for one.' No money was used, neither was there private property. However, inevitably a hierarchy of getting for self did emerge, and it split the social order into haves and have nots, workers and a controlling elite, a dualistic consciousness which eventually negated the territorial aura to the point where earthquakes, torrential rains, and volcanic eruptions presaged the complete sinking of the Atlantis continent over a few hundred years, as well as most of Lemuria, which was a dense archaepelago of islands stretching a few thousand miles across the south Pacific, a small fraction of which still exist from Hawaii to Indonesia.

These civilizations were quite advanced technically, inhabited by a billion souls each, but their hierarchy of consciousness created a culture of elites who controlled the masses

thru politics and priestcraft. Their destiny from this false consciousness could only be disaster, and so it came to be.

The billions of souls who lost their bodies in this mini version of the solar catastrophe went back to the Heavenly Abode, where they would reside until the time of future incarnations.

10

The End of Money Atonement

At this point, where both Atlantis and Lemuria were destroyed, elsewhere tribes of bodies and lost souls were spreading slowly around the planet, with a few centers of relatively higher civilization existing in Egypt, China, Mexico, India, Iraq and Chile, in and around the locations of the original pyramid temple cities. However, even these cultures were in a long, slow slide away from spiritualized consciousness, as the world's ever growing material energy built and destroyed kingdoms and empires.

The ego driven entities incarnating into bodies with their distorted consciousness of getting-for-self inevitably pulled awareness into a purely materialistic view, where the physical world is the only 'reality;' where people are only bodies, with a brain they must educate to think for itself. You can see where this leads by looking at the world right now, being overwhelmed by the negative effects of their erring social and economic causes.

Creation Universe put this civilization under money atonement over 5,000 years ago, to serve as a medium of exchange in the flow of producing and supplying needed goods and services. It would speed up the growth of society. But the UM did not create usury, though It did know from previous experience that charging interest on loans would be a necessary evil that would emerge here, along with the merciless consciousness of profiteering.

The true history of this planet is all written and recorded for playback in the akashic records, the mind bank. It is the sum total of all the words spoken and deeds done by all of humanity down thru the ages. This resonant field of energy and thought comprises the collective consciousness of the world.

5,000 years ago this field was weak and dark, relatively speaking. Money atonement was added as a catalyst to spark growth. This began in Babylon, when crude coins were manufactured out of metals and used in trade. All the rest would follow inexorably, with the attendant litany of negative effects accompanying the overall growth that occurred regardless, mostly guided by the underlying blueprint in the dna of the bodies.

Empires built thru violence would emerge and fall, and all those armies had to be armed, fed, transported, clothed and housed, which took money and lots of it. A banking system appeared, which was refined by King Solomon, the first incarnation of Baal-Lucifer, about 970 BC, who expanded taxation and charging interest on loans. His next appearance would be as Mayer Amschel Rothschild. All this was for this being to work out his karma by playing a key role in advancing the money world.

In spite of the violence and sometimes because of it, slowly, the human mind kept growing and eventually a civilized culture emerged, where philosophy, music and the arts began to enrich human consciousness, raising the vibration.

Politics, religion, industry, education and finance were wedded together in an unholy process of control and exploitation

of the people, which produced a hellish life for the masses as they bowed to the will of the elite. This negative energy too was recorded daily for playback in the mind, which for a long while has been hell on earth for most people, locked in a vicious struggle for survival.

The civilization would continue to grow thru a process philosopher Hegel described as “thesis and antithesis evolving one upon the other into the synthesis.” The Synthesis comes now, from within as a conscious Light of Spirit that is oneness in all ways arising within your soul, awakening and inspiring you; and without as Galactica makes open contact, and this civilization is transformed. This is God’s spirit being poured out upon all flesh; and it will manifest on earth as a sharing society, where all people are equal in all ways, no money used.

The Everlasting Gospel covers the subject of money atonement in so much depth, one can only defer to its wisdom by suggesting you read it directly to get the whole picture. However, the whole area of economics and money would be the key ingredient to raising the consciousness of society thru the industry of all sorts that were sponsored over time.

But capitalism isn’t a scientific, thought out system at all. It’s a system of negative effects, making money off of money, involved in exploiting the negative effects of war, crime, poverty, disease, all social ills resulting from an absence of synthesis consciousness. It has no heart, no conscience as a result. Because the system

makes money from these negative effects, it has to keep them going to stay alive. So the violence and suffering seems endless.

Except the dragon of global capitalism is ending, right on schedule, which is a miracle we can all be grateful for.

A system of natural, free giving and receiving takes its place. Being 'one for all, all for one', holding all things common and making free distribution according to need is the synthesis solution to the world's problems.

Contact with Galactica is happening now in this rising spirit, and the day comes soon when galactic space beings will come in on world TV and appear in the skies, setting off a great world celebration of planetary rebirth.

The Kingdom of God comes into being as a Revelation, not an event in evolution, and it is a spiritual and material utopia. The dross of conditioned mind that has clouded the cognition switches of souls in bodies will fall away, and radiant spiritual Truth will be perceived directly and absolutely. What follows will be obvious and natural. We will begin to set up the ways and means for the complete sharing of all things.

With galactic contact, all previous restrictions on life will evaporate as people's real needs are met. We let all superfluous things fall out of the picture. Like money and the ungodly money system that has ruled this world for a long while. The money changers along with all souls are forgiven our sins (errors against natural law) by the Universe, all realizing everyone has fallen short of Spirit God's Purpose. As we leave the hideous past

behind, life will quickly become joyous for everyone, even when processing one's old karma thru the body, which is why you have one in the first place.

As people's lives balance out and open up, we will sing a new song of life and love that is finally real. This will open up and balance out the planet's energy field over time, replacing the old recordings of pain and suffering under endless debt and war with those of Christ Conscious Reality, because the UM will be our new heart and mind, and IT IS Real! This is what transforms everything and everyone. The God Force of Love, Intelligence and spiritual Will comes Alive in US, each soul coming to realize we are all the Christ for whom we seek. Thence forward coming to live and act accordingly, blessed in Eternity. One again!
