

PLACENTIA

Planet of Plenty and Rebirth: A Special Healing Project

"Words go forth to fulfill the things for which they are sent and do not return to us void." This is the Universe's Law of Cause and Effect, operating eternally and exactly, known as the Law of Karma. And herein lies the tale of this planet (named Placentia - planet of plenty and rebirth on ETI star maps), because the entities of this solar system (Plentoria), got off the First Cause beam, so to speak, and a great cataclysm took place, a solar catastrophe, in which all life in this solar system was destroyed, and some 24 billion entities wound up spaced out, with no way to return to normal life.

We know that this seems incredible - at first. But as the ETI Story unfolds to you, it will reveal itself to be correct and true. Among other things, it explains what satanic power is, and how it came to exist in this solar system; plus, most importantly, how to heal it.

Because of the solar catastrophe, about 6 million years ago the Galactic Elohim began to set this planet up as a special healing project for these 24 billion entities to be redeemed back into real life in eternity, their etheric circuitry restored to normal. 16 billion were redeemed during the Pyramid Temple Cities period. 8 billion souls are left, 6 billion in bodies on the planet now, the others in the astral worlds of the Heavenly Abode.

The complete story, covering the 6 million year period of galactic involvement with this solar system, is found on the subsequent pages of this channeling focusing on Placentia's cosmic history. The ETI Story unfolds in this order: The Solar Catastrophe (What happened and why); This Placentia Project (The response of the God Force); The Pyramid Temple Cities (created by Galactic Beings); the Deluvian Period (the past 20,000 years).

Here and Now on Placentia

-John Lennon said: "Life is what's happening while you're busy making other plans." In other words, your karma and subsequently the karma of the

world, is being played out while people are caught up in just thinking about it, trying their best just to get along.

9/11 was a cosmic wake up call to the world, and America in particular. Unfortunately, they went right back to sleep, and they're having a nightmare.

Make no mistake about it, this world is in a crisis on every level, caused by wrong spiritual, social and economic causes. The system of getting-for-self has devolved life here to the point where humankind is rapidly destroying the very health and fabric of the planet, and themselves along with it.

This cannot continue, for it would only lead to all life being lost in a world-wide catastrophe/apocalypse, a replay of the solar catastrophe.

Please be clear, it is human beings who are in error that is causing this mess. The getting-for-self error in consciousness manifests in the false economic system of usury, which uses people up as fodder for the grist mill of capitalism. There is no Satan, only satanic energy, produced automatically by a satanic economic system that has no relationship to spiritual reality. Also, there is no religious man-God up on Cloud 9, there is only omnipotent, omnipresent, omniscient Consciousness that IS Living Spirit, Here and Now.

It is also humans who must act to serve with Spirit God and the Galactic Space Command in their own behalf to remedy the situation.

THIS CAN ALL BE TRANSFORMED THRU SPIRIT GOD'S WAYS OF SHARING, FORGIVING, GIVING AND RECEIVING.

-There is a solution! The whole world doesn't have to go into the karmic basement again to eat more sauerkraut. The world will be healed without going thru the experience of a WWII Armageddon.

In truth, millions of souls are awakening now, more every day. They are discovering spiritual truth within themselves. As the daydream fades and the veils lift, souls everywhere are endeavoring to unite and serve God's real purpose here.

The story of the situation today is explained in depth throughout the channelings of the Everlasting Gospel.

The Solar Catastrophe

A great revelation given in the Everlasting Gospel is that a catastrophe happened long ago in this solar system . . . which has been the cause of all the satanic negativity and duality that the people here have been dealing with in this space warp of consciousness.

About six million years ago, this solar system short-circuited, heated up and burned out in an atomic firestorm, leaving about 24 billion entities in space, without bodies. All of the planets were affected to varying degrees. The planet Maldek blew up completely, and all that remained is what we see as the asteroid belt. Saturn blew its crust, which is its ring of dust and rock particles. Jupiter burned up inside and the smoke emitted from its open poles circulated into a ball of swirling gases. This planet heated up and burned out on the inside as well.

There were several trillion beings in this Plentoria solar system when it started to heat up, and when Creation Mind called to the entities to come out of the solar system, most of them did. Godmind sent millions of Its holographic crystal ball computers into this solar system before the catastrophe to rebalance the souls here. Trillions of souls were turned around, and Galactica sent extra spaceships for them to leave the solar system. But the 24 billion who were left behind didn't listen to God, because they had crossed over too far into the realm of reactive thought. They disobeyed the Godmind when It told them, via the crystal ball computers It grows and can talk to Its souls through, that they should put the things they asked for out of their mind, because God couldn't give them what they wanted.

The movement that led to the Solar Catastrophe began with an entity known as Baal, and millions of others like him, who wanted to become false gods and have rule over the souls of this solar system. Spirit God told him this was impossible and to put the thought out of his mind.

There is no hierarchy in all of God's Creation, which is oneness in every way. But Baal couldn't let go of the idea; it had taken hold in his consciousness. Unknowingly, Baal had begun to reverse his consciousness, whence he began to "think he was thinking," falsely imagining he had uncovered what he believed was the 13th dimension, a new realm where a brain could create thought. In actuality, he was tuning into the mind force of Luciferic energies that are of subconsciousness in Creation, which operate the recycling system of the Universe. Hence he is known as Baal-Lucifer.

Baal began to promote a movement of souls who decided they wanted a mind they could think with, so they could plan part of their life and, individually, do what they wanted to do and go where they wanted to go. They imagined they had personal free will. Thus was the egocentric, reactive thinking mind, the pseudo-soul, activated in the solar system.

Satanic power began to build up as an automatic consequence from the use of this unreal consciousness. It is important here to realize there is no man-Satan, only satanic power resulting from ignorant actions out of balance with natural law. Neither is there a man-God as portrayed by earth religions. Omni God is Spirit, and It is eternal and infinite. It is Universal Cosmic Consciousness. Its thought operates the whole Universe. Its thought IS the Universe.

Evidently they were not satisfied with God's kind of romance, beauty, adventure and surprises. The thought of a great anarchist Spirit that created an all-knowing eternal Universe which goes on forever is a heavy thought for some souls to dwell on.

The souls here used their false notion of free will to develop an egoic mind they could "think" with. All thought originates in the Godmind, not in souls. The absolute creative freedom of living as a channel of God's Spirit is Universal Free Will, which we all share in. The secondary, dualistic thinking mind is not of the all-knowing Universal Mind, that is only perfect oneness in all ways. It is reactive ego-consciousness, thoughts spinning in an endless confusion of effects piled upon effects, divorced from cause. It was and is in the realm of Luciferic

energies: namely, nature's recycling system of energy and bacteria which returns matter back to pure energy. This is consciousness that is bound up in matter, thus in duality when divorced from spirit.

When consciousness is centered, the two-fold recycling energy is in balanced relativity, and souls exist completely in the positive Life Force of Christ Spirit and no problems exist. But embraced separately in ego-consciousness, thus moving away from the neutral synthesis, they get crossed up in one another. This is what caused a short-circuit in the psychic aura of this solar system, eventually leading to the atomic burnout of the whole Solar System.

After the Solar Catastrophe, it would take over 6 million years up until now for the energies to be returned to natural balance, wherein the souls being healed here could reunite with eternal life.

The knowledge of this karmic situation was too much for the souls here to bear in the past, so it couldn't be revealed until now, when the delivery is at hand. In normal Universe, ALL entities are ONE in the Christ-conscious energies of spiritual Life Force. Our awareness, which is God's Awareness, is constantly growing, expanding and transforming itself infinitely.

There is no separate ego involved at all, only souls unfolding together in oneness. Imagine an infinite field of flowers blooming endlessly in ever-new fashion under the beneficent rays of God's Spirit. But this is not what earth people cognize on when the word "evolution" is used. They imagine it refers to Darwin's theory of evolution regarding physical bodies. They don't realize Galactic beings set the whole process of life here in motion to redeem the entities lost in this ruined solar system. They believe "life is all the survival of the fittest, and man is the end of a long chain of developing life forms that emerged from a primordial cosmic soup, and the Universe started with a Big Bang. All of this is mortal-minded thought. As if the DNA genetic code were a fortuitous accident, and we are the lucky recipients. It is all false belief based on "thinking" entities are nothing more than bodies, with brains they have to educate to think, living in a Universe that is just matter floating in space.

The cosmic civilization of the eternal Universe is all of living Spirit – from Everlasting to Everlasting, ever expanding in constant new Joy! "Evolution" is a special word used to explain the changing, mutating nature of people, events and ideas on these special healing planets. It contrasts life going forward into higher and higher expressions of consciousness with negated energies going backwards in "devolution," down into heavier and heavier states.

To reverse this situation, and to rebalance and synthesize the energy and consciousness that led to this condition, and for other reasons we shall see, the being Baal-Lucifer has been incarnating in bodies on this planet, playing a recurring role down through history as the key leader of the money changers. All this is because the civilization has been under money atonement; where money would be used as an artificial stimulus to move society forward, and because the society it creates is yet in error, Spirit God would have to give nuclear atonement to finally bring an end to the error, which goes all the way back to the Solar Catastrophe; not by carrying out a nuclear trial by fire, however. Hiroshima and Nagasaki were quite enough. The psychological threat in consciousness alone has been enough to turn people back from the brink.

Spirit God thru the Galactic Space Command controls all nuclear weapons, so there is no danger. Spirit God's intervention through Galactica ends all war. Not with weapons, rather with benevolent spirituality that is indisputable. No one will resist God's Kingdom when it is offered to them, especially Baal-Lucifer. That soul is no longer lost in an illusion, he is forgiven as well. Spirit God has healed him, and returned him to a body at this time to play a positive role in eliminating money altogether.

When the PSI energy phase disconnected on automatic circuitry, before the "infection" could spread to other solar systems, the solar system overheated and blew out in a great catastrophe. This left the 24 billion entities spaced out of their eternal bodies, floating in the astral aura of the solar system, their etheric circuitry damaged. All consciousness, which resonates in the etheric space of a solar system, was burned away.

All of this was a negative effect resulting from their wrong social cause. It shows how powerful ideas are, and that once an idea gets started how hard it is to stop it. This is why it is so important to learn to monitor the thoughts in ones headset, and learn to only speak and act on the synthesis truth.

The GALACTIC COMMAND SPACE COMPLEX

Naturally, the Universe was not indifferent to what happened here in Plentoria solar system. It had done everything in Its power to get the entities straightened out and back in First Cause love service. Nevertheless, the Solar Catastrophe was a fact, and Creation Universe assigned space angels of Its Galactic Elohim, headquartered on the great planets Altamira and Altamedia at the Great Central Sun of the galaxy, to the task of redeeming the entities of this solar system who were lost in space.

ETI Galactic Beings are entities of the 12th density, synthesized in the highest energies of God consciousness. They (we) are a special team of cosmic souls who respond to these highly unusual situations (only 12 have happened in this galaxy, with 3 left after the delivery of Placentia). And the entity selected by natural ability to lead the team assigned to come here was and is Michael, who was first known to this world in ancient Egypt as Hermes Trismegistus, the thrice wise one, incarnated in a body now as Allen Michael. Michael, along with 12 other cosmic masters, are in charge of this special healing project which they set up on this planet, along with numerous other members of the Elohim.

We came to this solar system in our causation space ships, which are animated by the Universe's energy and Life Force and travel (teleport) at the speed of MIND.

Guided by the UM, we went to the outer reaches of the solar system to find a planet with huge polar ice caps. It had 4 moons. First we used PSI tractor beams and moved 3 of the moons to orbit around Jupiter. Then we moved the planet and moon into a closer orbit to the sun, the 3rd planet out, in orbit at just the right distance to support a biological environment on the outer surface.

We had first collected the 24 billion spaced out entities into special light ships to protect and care for them while the planet was set up for their habitation and healing. First, the Heavenly Abode was created as a large etheric world trailing the moon in orbit. The beings to be healed were all without bodies at this point, simply etheric souls with damaged circuitry. They were transferred to the Heavenly Abode, where they would spend their eternal days.

These souls would inhabit "Heaven" for the next five and a half million "years," before their incarnation sojourns to the planet to take up life in matter. Many of these beings would have trouble seating themselves in humanoid bodies once the period of human reincarnation began. To these souls with damaged etheric circuitry, a physical body would feel like putting on an uncomfortable heavy overcoat on a hot, humid day.

After bringing it into its new orbit, the planet was rotated 90 degrees on its axis, so the polar caps faced the sun and began to melt, covering much of the surface with water. At this point, the planet was totally barren of life. After the ice caps had mostly melted, we then introduced special bacteria to the hard rock, which began to transform it into dirt. Next we brought and planted special varieties of seeds, which were created specially by the Uni Mind for this project in a creative nova onboard our Mothership. The seeds took hold in the soil, and with the water and sunlight, began to grow, beginning the process of photosynthesis. Eventually, the plant life was so abundant and water plentiful that the planet's biosphere of oxygen and other gases, along with water vapor, formed naturally as the plants spread out to fill in the gaps between the greenhouses.

This process of building a planetary ecosystem and biosphere took a very long period of time to accomplish. The next phase took even longer. Again, we went to our creative nova. This time to get the species of Macroïd animals known as dinosaurs, along with seeds for the next level of plant life. We also manifested many other species of animals and birds and sea creatures, which began to evolve on the planet. They were brought down to the surface, the seeds planted

and dinosaurs and animals left to propagate for a few million years, spreading the plant life and also instigating the formation of oil deposits from their decomposing bodies; which we knew would be needed much later for the Industrial age.

At this point there was no permanent civilization or human bodies on the planet, only space stations.

Finally, this phase was completed. The planet was rotated once again on its axis, this time to the seasonal tilt position. This caused the land to erupt and slide on elevations, creating continents, with valleys, mountains, lakes and rivers, plus vast oceans surrounding all the land masses. The remaining species of dinosaurs perished in the process.

The EDEN PERIOD of PYRAMID TEMPLE CITIES

When the planet settled down after some millennia, we initiated the next phase, which was the creation of 12 magnificent Pyramid Temple Cities in the subtropical zone of the planet. This was the beginning of what is known as the Eden Period.

These Emerald Cities of God were set up as perfect communal environments, all formed around huge stone pyramids, which were charged with star energies that would radiate an aura many miles in diameter. The rest of the city was built within the aura, insuring a high consciousness would be present in the whole space. These cities were built with galactic technology and life was set up in a perfect communal fashion.

All was now ready for the healing of the spaced out entities to begin incarnating from the Heavenly Abode into humanoid bodies.

Again, Galactic Beings (us) went to our onboard nova. This time to create the special strain of self-reproducing humanoid body known as homo sapiens. We brought hundreds of thousands of these bodies (aged to be about 6) down to the planet and placed them in the communal cities, in our care. Then, the first wave of the spaced out microcosms in the Heavenly Abode were attracted on

vibration to flash into the humanoid bodies, thence to begin the process of reincarnation.

The Heavenly Abode is an etheric realm, an energy bubble if you will, which we built with Imagination, as per the UM's channel in us. It is a very large etheric realm that trails the moon in orbit about the planet, composed of many astral worlds that reflect the multifarious nature of the entities being healed here. It is where souls go to rest and recharge their batteries between incarnations. Souls also receive spiritual instruction relative to their karma, to enable them to overcome it when they return to a body.

It is important to note here that none of this is happening in normal Universe. Also, we as eternal Beings of the Universe, inhabit eternal bodies, which look just like the bodies here, except they are perfect and much lighter in nature. These eternal bodies also have the consummate ability to express the full range of higher powers we possess as living spirit: such as levitation, teleportation, telekinesis, telepathy, etc.

At first it was very difficult for the spaced out entities to get used to being in a 3-D physical body. However, there were numerous Galactic Beings present to manage and assist in the healing process the entities would have to go through. Galactic Beings had propagated a special 12-D strain of physical body to occupy, known as the Andromeda strain. These bodies were fully telepathic with the Godmind, eternal in nature.

The primary mechanism for the healing of the spaced out microcosms was to serve together, simply be on shift in the high energy communal environments that produced food, clothing, shelter, care, recreation, transportation, communications and utility energies, while also engaging in planning, development, logistics and the people's council of autonomous self-government. In other words, to re-enter the 12 schools of creative experience in the University of the Universe, rotating from one to another on a scheduled basis. This return to First Cause love services opened up their aura to receive the healing spirit of

God, allowing It to flow through them once again, slowly but surely repairing the dysfunctional circuitry in their etheric aura.

The whole social, physical and spiritual environment of the Pyramid Temple Cities was tailor made to assist the entities being healed. All was perfect in every way: Beautiful living quarters, all communal, where groups of beings on vibration would live together in housing complexes, which they decorated, kept clean and maintained themselves. Long-standing soul relationships with other beings they had known before the solar catastrophe automatically returned in their life as the entities came into bodies.

The biological environment was equally perfect, with beautiful parks and wholly organic, natural foods grown in magnificent gardens and orchards, pure water, fresh, clean air, abundant sunlight. Communal meals were all prepared and served in beautiful central dining complexes, all gourmet and all vegetarian. Every soul in a body was integrated into the society: that is, they had vital creative endeavors to attend to every day, along with adequate rest and relaxation. Every evening there were events to attend or perform in if one wished, such as music, dance and theater.

There was also the tantric yoga love spa to attend by all people, with partners on vibration; and the birthing palace was a place where women could give birth in a comfortable, natural environment. After the initial seeding of bodies here, the reproducing function brought all the bodies through the birth process, which was natural and essentially painless in a high trance state.

All care needs were met with highly trained healers who worked with them on all levels of their consciousness, keeping their bodies balanced and fit, assisting them with processing their mental and emotional imbalances, and keeping the energy open for the highest spiritual contact in Christ consciousness - to be accessed easily with simple breathing and meditation techniques.

There was also space transportation between the Emerald cities, and people were free to travel around the planet once they had achieved a degree of healing that allowed it. All the energy needs were provided from Dynadran

energy units, which is also what drive causation space ships. The Dynadran energy system radiates unlimited free energy, because it is drawn directly from the electromagnetic field itself.

People's sexual needs were fulfilled in the wonderful love spas, where one could engage in high, conscious tantric sexual union with members of the opposite sex, exchanging fluids, hormones and spiritual energies that kept the bodies healthy and spirits loving and light. When women became pregnant through their own choice, suspending their mental birth control, they were attended to in the Birthing Palace, where the child could be born in peace, wholistically, without any undue stress or complications.

Once their aura was healed and their consciousness resynthesized in the Christ spirit, the entities could regain eternal life in the normal Universe, able once again to inhabit an eternal body and return to Galactica.

Isn't Omni God wonderful!

These magnificent Emerald Cities existed here for over 400,000 years. During that period some 16 billion entities were redeemed back into normal Universe.

However, some 8 billion entities were never able to ground themselves properly in the bodies well enough to stay present in the communal projects, or to even incarnate into human bodies in the first place.

Many beings began to wander off, away from the cities, and were faced with having to survive out in raw nature, in 3-D consciousness. They began to form tribes of bodies all over the planet. Unfortunately, the harsh conditions and strange way of living, along with their damaged auras, set off a process of devolution in the bodies.

Eventually, all the beings who could be redeemed through the Pyramid Temple Cities had been processed. The Eden Period came to an end then, some 20,000 years ago, and the present Deluvian Period began.

The DELUVIAN PERIOD

At the end of the Eden Period, Galactic Beings removed all the technology and most of the structures in the Pyramid Temple Cities themselves. A new phase was to begin, and it would require a whole new approach to redeem the remaining 8 billion beings.

First off, there was the matter of the many souls who had drifted away from the Pyramid Cities, inhabiting mutated body forms, known as Java and Neanderthal man, and also the Grey Aliens with large black eyes. Rather than allow the process of devolution to get too strong, these beings were taken out of their bodies and the bodies destroyed through floods created by altering the orbit of the moon. This is the origin of the myth about Noah and the Ark. Taking these souls back into the Heavenly Abode allowed them to reincarnate again into healthy, normal bodies.

There was also the matter of setting up proper social environments for these entities to come into. This is where Solar Beings known as the Ascended Masters came into the picture. These entities were on closer vibration with the souls remaining to be healed, in the 7th density of consciousness. In the Solar Catastrophe, the energy in this solar system fell from the normal 12 densities of Reality, losing the 5-fold nature that constitutes Universal Christ Consciousness. Solar Beings were assigned to set up and direct communal centers in different locations on the planet: such as the areas now known as Egypt, India, Greece, China, Peru, Central America, Atlantis and Lemuria.

These Beings of the Solar Tribunal have incarnated down through the ages, and are known through the planet's history as spiritual avatars such as Krishna, Buddha, Mohammed, Moses and Jesus Christ, as well as thousands of other enlightened but less well known saints and sages.

The Ascended Masters from this Solar System knew the situation in advance, realizing they would be dealing with "a bunch of nuts that would be very hard to crack." That is, their egos would be extremely heavy and hard to open up to transcendental reality.

Thus, as the karma and consciousness of the beings came up, which was negative, the process of devolution began to set in. The entities now incarnating into bodies still found communal life to be difficult, and many immediately headed back out into the wilds to take up tribal life again. Others, under their own karma, found it very difficult to cope with being in a 3-D body, and thus were unable to tune into the higher energies of the Universal Mind. Slowly, the communal lifestyle began to break down all over the planet, initially being replaced by a benevolent hierarchy headed by a priesthood that was still in touch with cosmic reality.

Devolution is insidious, and as time passed eventually even the benevolent priests were replaced by souls who were less evolved in consciousness. The societies degenerated accordingly.

Now, all through this, Galactic Beings of the 12th density continued to monitor the whole situation, realizing that the Intelligence of Spirit God had the perfect plan in MIND that in time would deliver the whole world back into the eternal Kingdom. The essence of the Plan has been to inspire a growing consciousness in humanity as time progressed, up to this point where a world spiritual rebirth takes place as a main part of Contact with Galactica.

Nevertheless, slowly but surely, duality consciousness began to reign supreme, and the mind energy became heavier and heavier. The initial, high communal civilizations established by the Solar hierarchy degenerated into societies controlled by a ruling class who used power and priestcraft to control the masses of the people. Naturally, as the heavy karma set in, attendant negative effects of natural disasters and wars of conquest and rebellion became "normal."

Now, all of this, mind you, was taking place without any form of higher technology, or much if any connection to the higher 12th density synthesis energies. The cultural centers were maintaining life at a very raw and rudimentary level. And the tribal societies were totally primitive. And yet, bit by bit, the God Mind began to insinuate Its ideas in the form of philosophies and

inventions into the people's consciousness, leading them forward. Ultimately, this would take a few thousand years, up to now, when the potential for a new world culture that is oneness in all ways is ready to be fulfilled. This was done by incarnating high entities at specific points in time to do special things. Ever so slowly, the energies in the planet's morphogenetic field were being filled in and raised as the people incarnated over and over again to work out their karma.

The Return of Baal-Lucifer

This brings us to the time of King Solomon, around 1,000 B.C. At this time, the Ascended Masters had been working with the tribes of Jewish nomads for about a thousand years, from the time of Abraham. Moses was contacted from a space ship by Jehovah Lord God up on Mt. Sinai some 350 years previous to King Solomon, when he was given the Ten Commandments. All of this is pertinent, because King Solomon was the first incarnation of the entity Baal-Lucifer, the one who keyed off the energies leading to the Solar Catastrophe.

(Note: This important subject is covered in depth in Book 2: "Contact," Ch. 3, and all of Book 4: "Transcendence" and Book 6: "Freedom" of the Everlasting Gospel. These are pdf files read with Adobe Reader.)

Solomon was the son of David and Bathsheba, and he was carrying the heaviest karma of all the entities being redeemed here. So, his incarnation was Spirit God's way of getting the show on the road, so to speak, by applying a heavy dose of negativity as a prod to progress and latch to retrogression for the society of the time; which was mostly tribal and nomadic, basically going nowhere fast.

King Solomon changed all that in a hurry. Using the Ten Commandments as a basis, he set up a social system that had some surprising new features. The key element in this was the idea of usury: forcing people to put up collateral and pay interest on loans of either money or resources. This they had to do in the form of jewels, goods, animals, or in many cases the wives and children of a family. If the man failed to pay his debts, the women were put in Solomon's harem or killed and the children forced into slavery.

Of course, this worked like a charm, and King Solomon began to accumulate substantial wealth, which he immediately used to raise and equip an army, that could go out and conquer the less powerful. Once other tribes or societies were subjugated under his rule, they could be easily exploited. And, he inaugurated a system of courts and punishment for anyone who transgressed against his laws, which were arbitrarily created to sustain him and his system in power.

The positive thing King Solomon did was that he began to build and develop a vast empire, putting many people into creative activity. So in relativity, simultaneously, two powerful forces were set in motion: on the negative side, a usury system of exploitation and control of the people by a powerful elite; on the positive side, a growing social culture, with creative jobs for thousands and thousands of people. The old tribal status quo was blown to smithereens, but the heavy consequences of this progress under duality continue to plague the people to this very day.

The whole society of capitalistic getting-for-self based on greed and the love of money, as ingrained in the apparently sacrosanct notion of private money and private property, is referred to as "Babylon" in the Bible, and for good reason. This program is destroying all life on the planet, and the vast majority of people don't have a clue about what is happening or why.

This shows that once an idea gets set into motion, it is very, very difficult to change it. Hence, the positive completion to the Deluvian Period of this planetary project has required the incarnation of a cosmic adept who is of the energies of the Holy Ghost and the Holy Spirit. One who could understand the negative energies locked in duality, and know their cause, without being taken over by them. One who could explain it all, and give the synthesis solution that has the spiritual power to transform the whole satanic mess of this sick planet into a paradise world of absolute freedom, security and abundance for all people.

This entity was and is the one known in ancient times as Hermes Trismegistus, presently incarnate as Allen Michael, making Michael's Stand with the holy people of the world (Dan. 12:1-13), and fulfilling the role of the Comforter (St. John 14:16, 17, 26; 15:26; 16:7-13); the one who has revealed all that is truth in the channelings of God's prophesied Everlasting Gospel (Rev. 14:1-6). The one who brings all things to our remembrance.
